

8th

International
Symposium
Intra
Articular
Treatment

Bucharest **2-4 October**
2025

Preliminary Programme

Dear Colleagues,

It is with great pleasure that I invite you to the 8th International Symposium on Intra-Articular Treatment (ISIAT), taking place in the beautiful city of Bucharest.

Held every two years and rotating across Europe, the ISIAT Symposium brings together leading experts in the field of Intra-Articular treatment. It has become a key event for professionals interested in the latest advances in Intra-Articular access, therapeutic targets, innovative tools, and future developments.

This year's edition will feature lectures and keynote talks by renowned specialists, encouraging lively discussions and interdisciplinary collaboration. In addition, the symposium will offer hands-on courses in ultrasound-guided joint injections, covering a wide range of joints—an invaluable opportunity for both beginners and seasoned practitioners looking to refine their skills.

The symposium also provides a platform for researchers and clinicians to present their latest work through oral presentations and poster sessions. We warmly encourage submissions from all professionals involved in rheumatology, orthopedics, sports medicine, pain medicine, rehabilitation, and interventional radiology.

Our goal is to foster an engaging and multidisciplinary environment, promoting dialogue, innovation, and synergy among all stakeholders involved in the Intra-Articular field.

We are excited to host this exceptional event in Bucharest, and I look forward to welcoming you for what promises to be an inspiring and rewarding experience.

Warm regards,

Prof. Alberto Migliore
